Global Forum *agri benchmark*
August 21st 2014

Growth for all.

**We help to manage challenges in
global agriculture**

**We support public institutions in
making their cases and reaching
their goals.**

**We enable agribusiness to realize
trends early, to adjust strategies and
products and thus to grow.**

**We provide producers with insights
about global competition and thereby
enable them to take more profitable
decisions.**

Learn local, grow global.

Food is being produced locally but
markets are global.

You need reliable and comparable
data on farming systems to
understand dynamics.

Irrespective of whether you are
driven by economic, social or
environmental reasons.

agri benchmark is there to satisfy this
hunger for data and information.

We help to care.

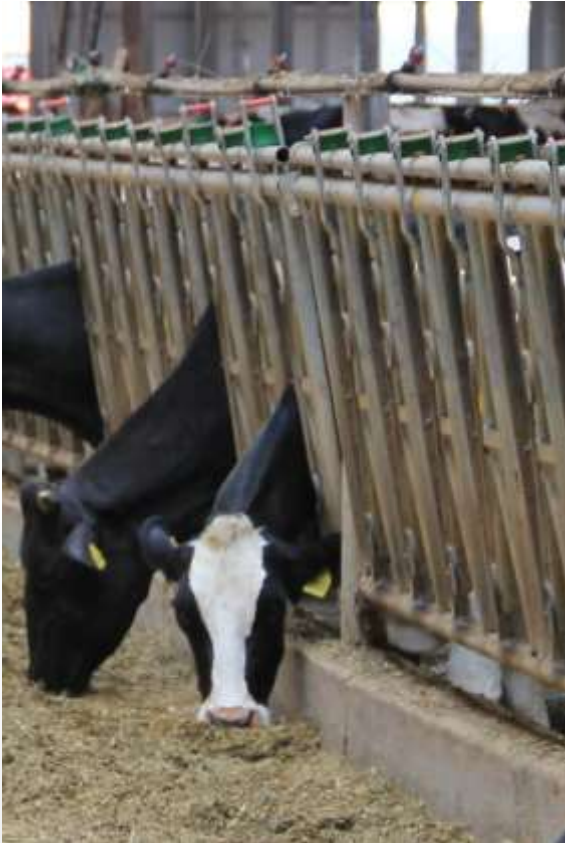

Growth means to care.

We help to better understand links between improved food supply and sustainable use of natural resources.

We generate appropriate benchmarks and identify potential to improve environmental standards.

From Cattle to Corn.

agri benchmark is the
center of expertise for
global crop, livestock and
horticulture.

We harvest data around the world.

Growth through independence.

We are a non-profit, non-political
network of production economists.
agri benchmark works independently,
hands-on and scientifically.

We compare apples with apples.

**Because we collect data with globally
standardized methods we deliver
reliable and comparable results.**

We dig deeper.

The unique depth and quality of our data guarantees appropriate support for your decision making.

But we still get the full picture.

Farmer's perspective is key – but we also understand the global commodity market in order to come up with meaningful conclusions.

Some of our recent clients.

A vibrant field of sunflowers with bright yellow petals and dark brown centers, growing densely together. The background is slightly blurred, emphasizing the flowers in the foreground.

Let's grow together.

We enable our clients to better manage challenges and to generate healthy growth.
